PROFILE SUMMARY

A dedicated full stack developer with internship experience, possessing a strong foundation in designing and developing responsive, user-friendly applications. Experienced in collaborating within dynamic team environments to deliver innovative and efficient solutions. Passionate about staying updated with emerging technologies and methodologies to continually enhance technical expertise and contribute meaningfully to development projects.

EXPERIENCE

Besant Technologies - Full Stack Developer Intern

Jul 2024 - Jan 2025

Motivated Full-Stack Developer Intern with hands-on experience in front-end and back-end development, working with HTML, CSS, Bootstrap, JavaScript, ReactJS, Python, and MySQL. Recognized for problem-solving skills, adaptability, and teamwork, with a focus on delivering efficient and user-friendly web applications.

Kev Achievements:

- Developed responsive web applications with a focus on UI/UX optimization, ensuring seamless user experience
 across devices.
- Integrated MySQL databases for efficient data management, retrieval, and performance optimization.
- Utilized ReactJS to build dynamic, reusable components and improve application maintainability.
- Debugged and optimized code to improve website performance, reducing load times and fixing errors.
- Enhanced website interactivity using JavaScript.

Hexaware Technologies - Email Executive

Aug 2022 - Sep 2023

Experienced Email Executive with over 1 year of expertise in email management, process improvement, and data analysis. Proficient in handling high-volume communications, problem-solving, and implementing productivity-enhancing solutions.

Kev Achievements:

- Managed and optimized email processes, improving response time and accuracy to enhance customer satisfaction.
- Resolved customer gueries efficiently, ensuring prompt and professional communication.
- Coordinated with cross-functional teams to streamline email handling procedures and reduce turnaround time.
- Demonstrated strong project management skills, successfully handling multiple tasks while meeting deadlines.

TECHNICAL SKILLS

• Front-End: HTML, CSS, JAVASCRIPT, BOOTSTRAP, REACTJS, Responsive Design.

Back-End: PythonDatabase: MySQL

Version control: Git, GitHub

PROJECTS

Personal Portfolio | HTML, CSS, JavaScript, Bootstrap | View Project

- Designed and developed a fully responsive personal portfolio website using HTML5, CSS3, JavaScript, and Bootstrap, ensuring cross-device compatibility.
- Implemented interactive UI components such as sliders, hover effects, and animations to enhance user experience (UX) and engagement.
- Utilized JavaScript for dynamic content updates, improving website performance and interactivity.

Travel Website | HTML, CSS, JavaScript, Bootstrap, ReactJS | View Project

- Developed a feature-rich travel website with an advanced search and filter system, leveraging JavaScript DOM manipulation for real-time updates.
- Implemented ReactJS for modular component-based development, improving state management and performance.
- Ensured a mobile-friendly, cross-browser compatible design using CSS and Bootstrap, enhancing user accessibility and navigation.
- Optimized the website performance by reducing unnecessary re-renders and improving data-fetching efficiency.

E-commerce Website | HTML, CSS, JavaScript, Bootstrap, ReactJS | View Project

- Designed and developed a dynamic e-commerce website featuring real-time product filtering and sorting to enhance the shopping experience.
- Utilized ReactJS for modular UI components, improving performance, scalability, and maintainability.
- Integrated JavaScript DOM manipulation to enable real-time search filtering and dynamic updates for a seamless user experience.
- Created a mobile-responsive and user-friendly UI/UX design using Bootstrap, ensuring accessibility across various devices.

Bank Transaction System | Python

- Developed a Python-based banking system with secure transaction processing and user account management to enhance financial operations.
- Applied Object-Oriented Programming (OOP) principles for modular, scalable, and maintainable code architecture.
- Implemented file handling techniques to securely store and retrieve transactional data, ensuring data integrity and persistence.
- Integrated robust error handling mechanisms to prevent system failures and manage exceptions, improving system reliability.

SQL Case Study: Virtual Reality Gaming Analytics | MySQL | View Project

- Conducted data analysis on customer purchasing behaviour using SQL queries, extracting valuable business insights for decision-making.
- Designed and executed complex SQL queries for data retrieval, filtering, and trend analysis, improving query efficiency by 30%.
- Created and managed a structured database for analytical reporting, enhancing data storage, retrieval performance, and business intelligence.

EDUCATION

BCA 2019 - 2022

Agurchand Manmull Jain College 9.16 CGPA

CERTIFICATION

Pursuing Python Full Stack Development at Besant technologies
