---

OBJECTIVE

An organized professional with experience in managing tasks and collaborating effectively in team settings. I developed a solid foundation in building responsive, user-friendly interfaces and collaborating effectively within teams. I am enthusiastic about learning new technologies and methodologies to enhance my frontend development capabilities further.

EXPERIENCE

- **Hexaware Technologies** - **Email Executive**   **Aug 2022 – Sep 2023**
  I have over 1 year of experience working as an Email Executive, where I was responsible for managing and improving various processes within the organization. My duties included increased productivity by 20% through data analysis and solution implementation. I am highly Skilled in project management, problem-solving, and precision.

- **Besant Technologies** – **Full Stack Developer Intern**   **May 2024 – Nov 2024**
  Motivated Junior Full-Stack Developer with practical experience in front-end and back-end development. Successfully completed an internship building dynamic applications using HTML, CSS, Bootstrap, JavaScript, jQuery, React JS, Python, and MySQL. Recognized for strong problem-solving skills, adaptability, and teamwork, with a commitment to delivering efficient, user-friendly solutions.
  - **Key Responsibilities:**
  - Built responsive web applications with optimized UI/UX design and seamless database integration.
  - Designed and managed MySQL databases, ensuring data accuracy and performance optimization.
  - Showcased effective communication and time management while addressing technical challenges and meeting deadlines.

EDUCATION

BCA   **2019 - 2022**
Agurchand Manmull Jain College

TECHNICAL SKILLS

- Front-End: HTML, CSS, JAVASCRIPT, BOOTSTRAP, REACTJS
- Back-End: Python
- Database: MySQL
- Version control: Git-GitHub

SOFT SKILLS

Communication, Growth mindset, Learning agility, Time management, Adaptability, Problem solving, Attention to details

PROJECTS

Parallax Website | view project
- Developed a vibrant, responsive website of incorporating parallax scrolling and multimedia elements for an engaging user experience.
- Optimized for both desktop and mobile platforms, achieving cross-platform compatibility and improved load times. Utilized HTML5, CSS3, and JavaScript for responsive layouts and rich visual effects.

Personal Portfolio | view project
- Built an interactive, mobile-responsive portfolio using HTML5, CSS, and JavaScript. Integrated sliders, animations, and hover effects to enhance user engagement and showcase front-end development skills.
- Used JavaScript to dynamically manage content and improve user interactivity, highlighting proficiency in UI/UX design and animation techniques.

E-commerce Website | view project
- Developed a responsive e-commerce product filter with HTML, CSS, and JavaScript. Employed JavaScript DOM manipulation to filter and display search results dynamically, optimizing for performance and mobile responsiveness.
- Implemented media queries and adaptable layouts for consistent functionality across devices

SQL Case Study: Virtual Reality Gaming Analytics | view case study
- Analysed customer purchasing behaviour for an e-commerce platform using SQL.
- Designed and executed complex queries to extract insights, improving data retrieval efficiency by 30%.
- Developed and maintained database for data analysis and reporting.

CERTIFICATION
- Python Full Stack Development
