PROFILE SUMMARY

Technical Support professional with experience in troubleshooting customer-reported issues, ticket management, issue investigation, and cross-functional coordination. Skilled in working with technical teams to drive faster resolutions, documenting recurring issues, and improving support processes. Experienced in Salesforce, ArcGIS, GeoHUB, and Orion. Strong written communication, problem-solving, and customer handling skills with the flexibility to work in rotational shifts.

PROFESSIONAL EXPERIENCE

Associate Technical Support | Tech Mahindra

May 2025 – Present

- Investigate and troubleshoot customer-reported technical issues using Salesforce, ArcGIS, GeoHUB, and Orion.
- Coordinate with internal technical and operational teams to drive issue resolution and provide timely status updates.
- Manage support tickets and ensure adherence to resolution timelines.
- Analyse issue patterns and document troubleshooting steps to support knowledge base improvements.
- Handle multiple concurrent cases in a fast-paced support environment.

Email Executive | Hexaware Technologies

Aug 2022 – Sep 2023

- Managed high-volume customer queries with a strong focus on resolution and customer satisfaction.
- Diagnosed software-related issues and coordinated with technical teams to deliver timely fixes.
- Provided clear, user-friendly responses to non-technical customers, translating complex issues into simple language.
- Followed structured workflows and documentation standards for consistent issue tracking.

KEY SKILLS

- Technical Troubleshooting: Investigate and resolve customer-reported technical issues using structured troubleshooting approaches.
- Ticket Management: Manage and track support tickets while ensuring timely updates and resolution.
- Issue Investigation: Analyse issues, identify root causes, and coordinate with relevant teams for resolution.
- Cross-Functional Collaboration: Work closely with technical and operational teams to resolve complex issues.
- Knowledge Base Documentation: Document troubleshooting steps and recurring issues to improve support processes.
- Problem Solving: Strong analytical and detail-oriented approach to issue resolution

TECHNICAL SKILLS

- Support Tools: Salesforce, Email Ticketing System, MS Excel, Piper, GeoHUB, Orion
- Technical Knowledge: HTML, CSS, JavaScript, Python, Application Flow Understanding, Debugging Fundamentals
- Database: MySQL (Joins, Group By, Subqueries)
- Version Control: Git, GitHub

PROJECTS

Bank Transaction System | Python

- Built a console-based banking application using OOP and file handling, simulating deposit, withdrawal, balance check, and transaction logging.
- Focused on debugging and exception handling — skills directly applicable to diagnosing and resolving customer-reported technical issues.

Personal Portfolio | HTML, CSS, JavaScript, Bootstrap

- Developed a fully responsive personal website, demonstrating understanding of frontend behaviour and UI-related bugs customers commonly encounter.

SQL Case Study Project | MySQL

- Analysed real-world business datasets using JOINS, GROUP BY, and subqueries to validate data and surface actionable insights — supporting data-related troubleshooting skills.

EDUCATION & CERTIFICATION

Bachelor of Computer Applications (BCA)

2019 – 2022

Agurchand Manmull Jain College | CGPA: 9.16 / 10

Certification: Python Full Stack Development — Besant Technologies
